

■ 100 Days SQL Journey

Day 04

■ Today's Topic

Selecting only the columns you need with SELECT.

■ A Little Message for Today

Consistency beats speed. Every small query you write strengthens your SQL skills. Keep going—you're making real progress.

■ Quick Revision

Use SELECT to choose specific columns instead of *. Example: SELECT product_name, price FROM products;

■ Today's SQL Missions

- Mission 1 (Very Easy): Display only the department_name column from the departments table. (Hint: SELECT department_name ...)
- Mission 2 (Easy): Display only first_name and email from the employees table.
- Mission 3 (Easy+): Display product_name and price from the products table.
- Mission 4 (Medium): Display customer_name and city from the customers table.
- Mission 5 (Challenge): Display order_id, customer_id and order_date from the orders table.

■ Bonus Challenge

Display product_id, product_name and category from the products table.

■ SQL Tip

Select only the columns you need. It makes queries easier to read and often more efficient.

■ Tomorrow's Preview

Next, you'll practice combining SELECT with LIMIT for even better control over results.
