

■ 100 Days SQL Journey

Day 05

■ Today's Topic

Practice using SELECT with LIMIT to retrieve only the rows you need.

■ A Little Message for Today

Confidence grows one small success at a time. Every query you finish today is another step toward becoming a skilled SQL developer.

■ Quick Revision

LIMIT restricts how many rows SQL returns. Example:

```
SELECT product_name FROM products LIMIT 5;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display the first 3 rows from the departments table. (Hint: Use LIMIT 3.)
- Mission 2 (Easy): Display first_name and last_name from the first 5 employees.
- Mission 3 (Easy+): Display product_name and price from the first 8 products.
- Mission 4 (Medium): Display customer_name and city from the first 10 customers.
- Mission 5 (Challenge): Display order_id, customer_id and order_date from the first 12 orders.

■ Bonus Challenge

Display the first 7 rows from the employees table showing only employee_id, first_name and last_name.

■ SQL Tip of the Day

Use LIMIT while practicing so your output stays short and easy to read.

■ Tomorrow's Preview

Tomorrow you'll start filtering data to find exactly the records you need.
