

■ 100 Days SQL Journey

Day 06

■ Today's Topic

More practice with SELECT, choosing columns, and LIMIT.

■ A Little Message for Today

Learning isn't about rushing—it's about building strong foundations. Every practice session makes tomorrow's SQL feel easier.

■ Quick Revision

You can combine SELECT with LIMIT to display only specific columns and only a few rows.

```
SELECT first_name, last_name FROM employees LIMIT 5;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display only the employee_id and first_name columns from the first 5 rows of the employees table. (Hint: Combine SELECT and LIMIT.)
- Mission 2 (Easy): Display department_id and department_name from the first 4 departments.
- Mission 3 (Easy+): Display product_id, product_name and price from the first 6 products.
- Mission 4 (Medium): Display customer_id, customer_name and city from the first 8 customers.
- Mission 5 (Challenge): Display order_id, customer_id, employee_id and order_date from the first 10 orders.

■ Bonus Challenge

Display the first 5 rows from the products table showing only product_name and category.

■ SQL Tip of the Day

Write one query at a time and verify the output before moving to the next mission.

■ Tomorrow's Preview

Tomorrow you'll continue sharpening your SELECT skills before unlocking data filtering.
