

■ 100 Days SQL Journey

Day 07

■ Today's Topic

Building confidence with SELECT, specific columns, and LIMIT.

■ A Little Message for Today

Success comes from showing up again and again. Every query you practice today makes the next challenge feel a little easier.

■ Quick Revision

Use SELECT to choose columns and LIMIT to control how many rows are returned.

```
SELECT customer_name, city FROM customers LIMIT 5;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display employee_id and last_name from the first 5 employees. (Hint: Combine SELECT and LIMIT.)
- Mission 2 (Easy): Display department_id and department_name from the first 3 departments.
- Mission 3 (Easy+): Display product_name, category and price from the first 7 products.
- Mission 4 (Medium): Display customer_id, customer_name and email from the first 6 customers.
- Mission 5 (Challenge): Display order_id, order_date, customer_id and employee_id from the first 10 orders.

■ Bonus Challenge

Display the first 8 rows from the employees table showing employee_id, first_name and email.

■ SQL Tip of the Day

Practice typing queries yourself instead of copying them. It helps you remember the syntax much faster.

■ Tomorrow's Preview

Tomorrow you'll solve more real-world practice questions before moving on to filtering data.
