

■ 100 Days SQL Journey

Day 08

■ Today's Topic

Strengthening SELECT, choosing columns wisely, and using LIMIT.

■ A Little Message for Today

Progress isn't measured by perfection. Every query you complete adds another brick to your SQL foundation. Keep believing in your daily practice.

■ Quick Revision

SELECT retrieves only the columns you ask for, while LIMIT controls the number of rows shown.
`SELECT order_id, order_date FROM orders LIMIT 5;`

■ Today's SQL Missions

- Mission 1 (Very Easy): Display only employee_id and email from the first 5 employees. (Hint: Use SELECT with LIMIT.)
- Mission 2 (Easy): Display department_name from the first 4 departments.
- Mission 3 (Easy+): Display product_id, product_name and category from the first 6 products.
- Mission 4 (Medium): Display customer_name, email and city from the first 8 customers.
- Mission 5 (Challenge): Display order_id, customer_id, employee_id and order_date from the first 12 orders.

■ Bonus Challenge

Display the first 10 rows from the products table showing product_name and price only.

■ SQL Tip of the Day

Write your queries neatly with each keyword in uppercase to improve readability.

■ Tomorrow's Preview

Tomorrow you'll tackle another set of practice missions to master the basics before learning WHERE.
