

■ 100 Days SQL Journey

Day 09

■ Today's Topic

Becoming comfortable with SELECT, choosing columns, and LIMIT.

■ A Little Message for Today

Every expert once practiced the basics. Your patience today will become your confidence tomorrow. Keep your streak alive!

■ Quick Revision

Combine SELECT with LIMIT to return only the columns and rows you need.

```
SELECT customer_id, customer_name FROM customers LIMIT 5;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display employee_id and first_name from the first 6 employees. (Hint: Use LIMIT 6.)
- Mission 2 (Easy): Display department_id and department_name from the first 5 departments.
- Mission 3 (Easy+): Display product_name, category and price from the first 8 products.
- Mission 4 (Medium): Display customer_id, customer_name and email from the first 10 customers.
- Mission 5 (Challenge): Display order_id, customer_id, employee_id and order_date from the first 15 orders.

■ Bonus Challenge

Display product_id, product_name and price from the first 5 products.

■ SQL Tip of the Day

Review your query after running it. Small syntax mistakes are one of the fastest ways to learn.

■ Tomorrow's Preview

Tomorrow is your final day of mastering the fundamentals before moving to data filtering with WHERE.
