

■ 100 Days SQL Journey

Day 12

■ Today's Topic

Using **AND** with the WHERE clause.

■ A Little Message for Today

You're moving beyond the basics. Every new concept helps you ask better questions and discover the right data faster.

■ Quick Revision

Use **AND** when all conditions must be true.

```
SELECT * FROM employees WHERE department_id = 2 AND employee_id = 5;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display the employee whose employee_id is 1 AND department_id is 1. (Hint: Use WHERE with AND.)
- Mission 2 (Easy): Display products where category is 'Electronics' AND price is greater than 1000.
- Mission 3 (Easy+): Display customers whose city is 'Bangalore' AND customer_id is greater than 2.
- Mission 4 (Medium): Display orders where customer_id is 1 AND employee_id is 2.
- Mission 5 (Challenge): Display first_name, last_name and email of employees whose department_id is 2 AND employee_id is greater than 3.

■ Bonus Challenge

Choose any table and write a query using two conditions joined by AND.

■ SQL Tip of the Day

Read each condition separately, then confirm both must be true before running your query.

■ Tomorrow's Preview

Tomorrow you'll learn how to use **OR** to match one condition or another.

■ Git Commit Message

Completed Day 12 SQL Mission

■ Today's Progress

- Read today's revision
- Mission 1
- Mission 2
- Mission 3
- Mission 4
- Mission 5
- Bonus Challenge

■ Closing Note

Great work! You're learning how to make your queries more precise. Keep practicing, and these patterns will soon become second nature.
