

■ 100 Days SQL Journey

Day 13

■ Today's Topic

Using **OR** with the WHERE clause.

■ A Little Message for Today

Every new SQL concept gives you another way to solve real problems. Stay curious and enjoy the process—you're making steady progress.

■ Quick Revision

Use **OR** when at least one condition should be true.

```
SELECT * FROM customers WHERE city='Bangalore' OR city='Mumbai';
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display customers whose city is 'Bangalore' OR 'Mumbai'. (Hint: Use WHERE with OR.)
- Mission 2 (Easy): Display products whose category is 'Electronics' OR 'Furniture'.
- Mission 3 (Easy+): Display employees whose department_id is 1 OR 2.
- Mission 4 (Medium): Display orders placed by customer_id 1 OR customer_id 2.
- Mission 5 (Challenge): Display first_name, last_name and email of employees whose department_id is 2 OR employee_id is greater than 8.

■ Bonus Challenge

Write a query that returns rows matching either of two different values from any table in the database.

■ SQL Tip of the Day

Use parentheses when combining AND and OR in the same query to make your logic clear.

■ Tomorrow's Preview

Tomorrow you'll learn how to exclude records using **NOT**.

- Mission 3
- Mission 4
- Mission 5
- Bonus Challenge

■ Closing Note

Fantastic work! You're learning to think logically with SQL conditions. Keep practicing, and these patterns will soon feel natural.
