

■ 100 Days SQL Journey

Day 14

■ Today's Topic

Using **NOT** with the WHERE clause.

■ A Little Message for Today

Every challenge you solve expands your thinking. Keep practicing with patience, and you'll soon write SQL queries with confidence.

■ Quick Revision

Use **NOT** to exclude rows that match a condition.

```
SELECT * FROM products WHERE NOT category='Electronics';
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display all products that are NOT in the 'Electronics' category. (Hint: Use WHERE NOT.)
- Mission 2 (Easy): Display customers who are NOT from 'Bangalore'.
- Mission 3 (Easy+): Display employees whose department_id is NOT 1.
- Mission 4 (Medium): Display orders that were NOT placed by customer_id 1.
- Mission 5 (Challenge): Display employee_id, first_name and last_name for employees whose department_id is NOT 2.

■ Bonus Challenge

Choose any table and write a query that excludes one specific value using NOT.

■ SQL Tip of the Day

When your result looks unexpected, read the condition aloud. It often helps you spot logical mistakes.

■ Tomorrow's Preview

Tomorrow you'll learn how to filter multiple values easily using **IN**.
