

■ 100 Days SQL Journey

Day 17

■ Today's Topic

Review: Combining WHERE, AND, OR, NOT, IN and BETWEEN.

■ A Little Message for Today

You've learned several filtering techniques already. Today's practice is about choosing the right one for each situation. Keep trusting your progress!

■ Quick Revision

SQL offers many ways to filter data. Pick the operator that best matches the question you're trying to answer.

```
SELECT * FROM employees WHERE department_id IN (1,2) AND employee_id  
BETWEEN 1 AND 10;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display employees whose employee_id is BETWEEN 1 AND 5.
- Mission 2 (Easy): Display customers whose city is IN ('Bangalore', 'Mumbai').
- Mission 3 (Easy+): Display products whose category is NOT 'Electronics'.
- Mission 4 (Medium): Display orders where customer_id IN (1, 2, 3) AND order_id BETWEEN 1 AND 20.
- Mission 5 (Challenge): Display employee_id, first_name and last_name for employees whose department_id IN (1, 2) AND employee_id BETWEEN 2 AND 8.

■ Bonus Challenge

Write one query that combines at least two filtering operators you've learned this week.

■ SQL Tip of the Day

Before writing a query, describe the condition in plain English. Then translate it into SQL.

■ Tomorrow's Preview

Tomorrow you'll solve more business-style filtering problems to strengthen your SQL thinking.
