

■ 100 Days SQL Journey

Day 19

■ Today's Topic

Business-style filtering practice using WHERE operators.

■ A Little Message for Today

You're becoming more confident with every challenge. Keep focusing on understanding the problem before writing the query—great SQL starts with clear thinking.

■ Quick Revision

Combine operators like **AND**, **OR**, **IN**, **NOT**, and **BETWEEN** to answer real business questions.
`SELECT * FROM customers WHERE city IN ('Mumbai', 'Bangalore');`

■ Today's SQL Missions

- Mission 1 (Very Easy): Display all employees whose employee_id is BETWEEN 2 AND 6.
- Mission 2 (Easy): Display customers whose city is IN ('Delhi', 'Mumbai').
- Mission 3 (Easy+): Display products whose category is NOT 'Furniture' AND price BETWEEN 500 AND 5000.
- Mission 4 (Medium): Display orders where customer_id IN (1, 2, 3) AND employee_id IN (1, 2).
- Mission 5 (Challenge): Display employee_id, first_name and last_name for employees whose department_id = 2 OR department_id = 3, but employee_id is NOT BETWEEN 1 AND 2.

■ Bonus Challenge

Write one query that combines WHERE, IN, and BETWEEN to answer a realistic business question.

■ SQL Tip of the Day

When queries become long, format each condition on a new line to improve readability.

■ Tomorrow's Preview

Tomorrow you'll complete this filtering chapter with a mixed practice challenge before moving to ORDER BY.
