

■ 100 Days SQL Journey

Day 20

■ Today's Topic

Final review of WHERE, AND, OR, NOT, IN, and BETWEEN.

■ A Little Message for Today

You've completed another major milestone. The effort you put into mastering filtering will make every future SQL topic easier to understand.

■ Quick Revision

Use the right filtering operator based on the question you're answering. You can combine multiple conditions to retrieve exactly the data you need.

```
SELECT * FROM products WHERE category IN ('Electronics', 'Furniture') AND price BETWEEN 1000 AND 5000;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display employees whose employee_id is BETWEEN 1 AND 10.
- Mission 2 (Easy): Display customers whose city is NOT 'Delhi'.
- Mission 3 (Easy+): Display products whose category is IN ('Electronics', 'Furniture') AND price BETWEEN 1000 AND 5000.
- Mission 4 (Medium): Display orders where customer_id IN (1, 2, 3) AND employee_id NOT IN (4, 5).
- Mission 5 (Challenge): Display employee_id, first_name and last_name for employees whose department_id IN (1, 2, 3) AND employee_id BETWEEN 2 AND 10.

■ Bonus Challenge

Write a single query that combines at least three filtering operators to answer a realistic business question using the database.

■ SQL Tip of the Day

Choose readability over cleverness. Well-formatted SQL is easier to debug and maintain.

■ Tomorrow's Preview

Tomorrow you'll begin a brand-new chapter: sorting query results with **ORDER BY**.

■ Git Commit Message

Completed Day 20 SQL Mission

■ Today's Progress

- Read today's revision
- Mission 1
- Mission 2
- Mission 3
- Mission 4
- Mission 5
- Bonus Challenge

■ Closing Note

Congratulations on completing the filtering module! You're now ready to organize and analyze data in even more powerful ways. Keep your streak alive!
