

■ 100 Days SQL Journey

Day 22

■ Today's Topic

Sorting data with **ORDER BY DESC**.

■ A Little Message for Today

You're learning to view data from different perspectives. Sorting in reverse order is a simple skill that reveals valuable insights.

■ Quick Revision

Use **DESC** with **ORDER BY** to sort from highest to lowest or Z to A.

```
SELECT product_name, price FROM products ORDER BY price DESC;
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display all departments sorted by department_name in descending order. (Hint: Use ORDER BY ... DESC.)
- Mission 2 (Easy): Display employees sorted by first_name in descending order.
- Mission 3 (Easy+): Display products sorted by price from highest to lowest.
- Mission 4 (Medium): Display customers sorted by customer_name in reverse alphabetical order.
- Mission 5 (Challenge): Display orders sorted by order_date from newest to oldest.

■ Bonus Challenge

Display employees sorted by employee_id in descending order.

■ SQL Tip of the Day

Use **DESC** when you want to quickly find the latest, highest, or largest values.

■ Tomorrow's Preview

Tomorrow you'll learn to sort using multiple columns with **ORDER BY**.
