

■ 100 Days SQL Journey

Day 24

■ Today's Topic

Finding text using the **LIKE** operator.

■ A Little Message for Today

You're entering a new stage of SQL. Learning to search for text patterns will help you answer questions that exact matches cannot.

■ Quick Revision

The **LIKE** operator searches for text patterns. The % wildcard represents zero or more characters.

```
SELECT * FROM customers WHERE customer_name LIKE 'A%';
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display all customers whose customer_name starts with the letter 'A'. (Hint: Use LIKE 'A%'.)
- Mission 2 (Easy): Display all employees whose first_name starts with the letter 'J'.
- Mission 3 (Easy+): Display all products whose product_name starts with the letter 'S'.
- Mission 4 (Medium): Display all departments whose department_name starts with the letter 'H'.
- Mission 5 (Challenge): Display all customers whose city starts with the letter 'B'.

■ Bonus Challenge

Choose any text column in the database and find all values that start with a letter of your choice using LIKE.

■ SQL Tip of the Day

Use LIKE for pattern matching and = when you need an exact text match.

■ Tomorrow's Preview

Tomorrow you'll use wildcards to find values that end with specific letters.

Completed Day 24 SQL Mission

■ Today's Progress

- Read today's revision
- Mission 1
- Mission 2
- Mission 3
- Mission 4
- Mission 5
- Bonus Challenge

■ Closing Note

Excellent work! You're learning to search data in smarter ways. Keep practicing, and pattern matching will soon feel natural.
