

■ 100 Days SQL Journey

Day 28

■ Today's Topic

Combining **LIKE** patterns using % and _.

■ A Little Message for Today

You've learned several ways to search text. Today's practice is about choosing the right pattern for the question you're trying to answer.

■ Quick Revision

You can combine % (zero or more characters) and _ (exactly one character) in the same LIKE pattern.

```
SELECT * FROM customers WHERE customer_name LIKE 'A_%';
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display customers whose customer_name starts with 'A'.
- Mission 2 (Easy): Display employees whose first_name contains the letter 'a'.
- Mission 3 (Easy+): Display products whose product_name starts with 'S' and ends with 'r'.
- Mission 4 (Medium): Display departments whose department_name has 'e' as the second character.
- Mission 5 (Challenge): Display customers whose city starts with 'B' and contains the letter 'o' anywhere after the first character.

■ Bonus Challenge

Write a LIKE query that uses both % and _ together on any text column in the database.

■ SQL Tip of the Day

Test your LIKE pattern with a few different values to make sure it matches exactly what you expect.

■ Tomorrow's Preview

Tomorrow you'll solve mixed pattern-matching challenges before moving to aggregate functions.

■ Git Commit Message

Completed Day 28 SQL Mission

■ Today's Progress

- Mission 1
- Mission 2
- Mission 3
- Mission 4
- Mission 5
- Bonus Challenge

■ Closing Note

You're becoming more comfortable with text searches every day. Keep practicing, stay curious, and celebrate each small win along the way!
