

■ 100 Days SQL Journey

Day 29

■ Today's Topic

Mixed practice with **LIKE**, **%**, and **_** wildcards.

■ A Little Message for Today

You're almost done mastering text searching. Every pattern you practice today will help you write faster and smarter SQL queries tomorrow.

■ Quick Revision

Combine **LIKE** with **%** and **_** to search for flexible text patterns.

```
SELECT * FROM employees WHERE first_name LIKE 'J%n';
```

■ Today's SQL Missions

- Mission 1 (Very Easy): Display customers whose customer_name starts with the letter 'S'.
- Mission 2 (Easy): Display employees whose first_name ends with the letter 'n'.
- Mission 3 (Easy+): Display products whose product_name contains the letters 'pro'.
- Mission 4 (Medium): Display departments whose department_name has exactly one character before the letter 'e'.
- Mission 5 (Challenge): Display customers whose city starts with 'B' and ends with 'e'.

■ Bonus Challenge

Write a query that combines both **%** and **_** in the same **LIKE** pattern on any text column.

■ SQL Tip of the Day

When a **LIKE** query returns no rows, double-check your wildcard placement.

■ Tomorrow's Preview

Tomorrow you'll complete the pattern-matching chapter with a final review before moving to aggregate functions.
